

Integrated Core Practice Model Training (ICPM)

Capacity-building for Cross-Sector Leadership and the Workforce

ICPM Training Shifts Systems and Practice Towards Wellness

ICPM strengthens the capacity of every professional to **create healing relationships** with the children, youth, and families they serve. Implementation of ICPM training leads to **wholeness in the community** and across departments, and improvements at the system level.

ICPM Training Objectives

Utilize available tools, supports, and resources to build and sustain your County's Wellness System.

Learn about your County's vision and your role for helping build a Child, Youth, and Family Wellness System.

Engage in a process of learning that helps translate new knowledge and skills into daily practice

Is ICPM Training the "right next step" for your County?

- ☑ Is your County **Interagency Leadership Team (ILT)** committed to implementation of AB 2083?
- ☑ Are your County public systems and community partners prepared to **leverage each other's initiatives** (i.e., Juvenile Justice Reform, Comprehensive Prevention Plan, CalAim, Community Schools)?
- ☑ Would greater **System of Care alignment** and integration create efficiencies?
- ☑ Do you desire to **build local capacity to sustain ongoing implementation** without the need for ongoing consultant costs?

Training Delivery Method

The ICPM training utilizes a **5-hour hybrid format** consisting of an asynchronous e-learning, followed by an in-person training, maximizing participant choice.
